

to hit someone three times. It is not a burdensome objection. I wish it were less cumbersome to handle through the Department of Revenue. I do not believe it is necessary to have the amount of money in the fiscal note that is included in reference to the Department of Revenue. I think it is excessive. But I would rather that those figures be excessive and we find out that they are not going to be that much than the other way around, which frequently happens in this institution. I believe that once it is established it is not going to be that much of a problem. If Senator Murphy wants to put some money in the Department of Environmental Control for litter control, he's been here several years. I've never noticed him to introduce an amendment to that effect. I recognize that there are other ways of doing it. If someone has a better way, fine with me. I think that this was my idea. I offered it to you. Take it or leave it, but let's not drag it out. I oppose the amendment.

PRESIDENT: Senator Maresh.

SENATOR MARESH: Mr. President, members of the Legislature. A question of Senator Murphy. Senator Murphy, what "A" bill will your amendment provide for?

SENATOR MURPHY: I'm sorry, I did not understand that.

SENATOR MARESH: What size of "A" bill will your amendment provide for? How big of an "A" bill will it take?

SENATOR MURPHY: I would assume that it would not change the expenditures at all, Senator Maresh. I'm simply wanting to change the method in which we derive the funds.

SENATOR MARESH: How will the money be spent?

SENATOR MURPHY: The bill would remain intact. It would be spent in the same manner as the bill provides.

SENATOR MARESH: For plastic bags.

SENATOR MURPHY: For whatever ultimately comes out in this bill, yes. I'm not changing any of the propositions in the bill other than the manner in which we arrive at the funding. All of the provisions for litter bags, or whatever, it's fine by me, although I did have a little bit of a qualm when we were discussing the size and shape of containers because the other day, going home, there was a young lady walking along the highway. My wife and I stopped and gave her a ride and she had just been put out of her car by her boyfriend and I don't know what size bag you put that in.

SENATOR MARESH: Thank you Senator Murphy.

PRESIDENT: Senator Kelly. What size?

SENATOR KELLY: Mr. President, I'd like to visit with my plumber friend from South Sioux City.

SENATOR MURPHY: Yes sir.
